SA Learnerships and Skills Development Portal

Sprint 1 Backlog

ID	User Story	Tasks	Assigned to	Status	Story Points
US-1	As a user, I want to register using Google so that I can create an applicant account by default.	Implement Google authentication Assign Applicant role Redirect users to the dashboard	Dikeledi	Completed	5
US-2	As a user, I want to log in using Google so that I can access my account based on my role.	Implement Google login Redirect users to their role-specific dashboard	Ozuko	Completed	3
US-3	As a provider, I want to post opportunities so that applicants can apply to them.	Implement provider role assignment by admin Create opportunity form Store opportunity details Admin approval workflow	Tlhalefo	Completed	8

US-4	As an admin, I want to approve or remove opportunities so that applicants can view valid listings.	View pending opportunities Approve or reject opportunities Publish approved opportunities to applicants	Musawenkosi	Completed	5
-------------	---	---	-------------	------------------	----------

User Story 1: Register

As a user, I want to register so that I can create an applicant account by default.

UAT:

- **Given** I am a new user with a Google account
- **When** I register
- **Then** I should be logged in as an Applicant and taken to the dashboard

User Story 2: Login

As a user, I want to log in using Google so that I can access my account based on my role.

UAT:

- **Given** I am a registered user
- **When** I log in using Google
- **Then** I should be redirected to my role-based dashboard

User Story 3: Post Opportunity

As a provider, I want to post opportunities so that applicants can apply to them.

UAT:

- **Given** I am an authenticated provider
- **When** I create an opportunity
- **Then** it should appear in the admin approval list

User Story 4: Approve Opportunity

As an admin, I want to approve or remove opportunities so that applicants can view valid listings.

UAT:

- **Given** I am an authenticated admin
 - **When** I approve an opportunity
 - **Then** it should be visible to applicants
-

Role Assignment Process

- All users register into the system as Applicants by default.
 - The first user to register in the system becomes the Master Admin.
 - The Master Admin is responsible for assigning roles to users, such as Admin or Provider.
 - Admins can also assign roles to other users and make them admins/providers.
 - Once a role is assigned, users gain access to system features based on their assigned role.
-

User Story – Requirement Traceability Matrix

This section provides a traceability mapping between the system's user stories and the corresponding documented requirements defined for the project.

User Story 1: Register

Requirement Linked User Verification-> A 3rd party identity provider should be used.
3 roles: Applicant, Provider (Employer / Training Organisation), Admin.

Extra Info Covered: This user story covers the authentication and automatic role assignment process using Google as a third-party identity provider. It ensures that every new user is registered into the system as an Applicant by default.

User Story 2: Login

Requirement Linked: User Verification-> A 3rd party identity provider should be used.
3 roles: Applicant, Provider (Employer / Training Organisation), Admin.

Extra Info Covered: This user story covers user authentication and login functionality using Google. It ensures that authenticated users are redirected to the correct role-based dashboard after login.

User Story 3: Post Opportunity

Requirement Linked: Opportunity Listing-> Providers should be able to post learnership or internship opportunities, including title, description, stipend, location, duration, requirements, and closing date

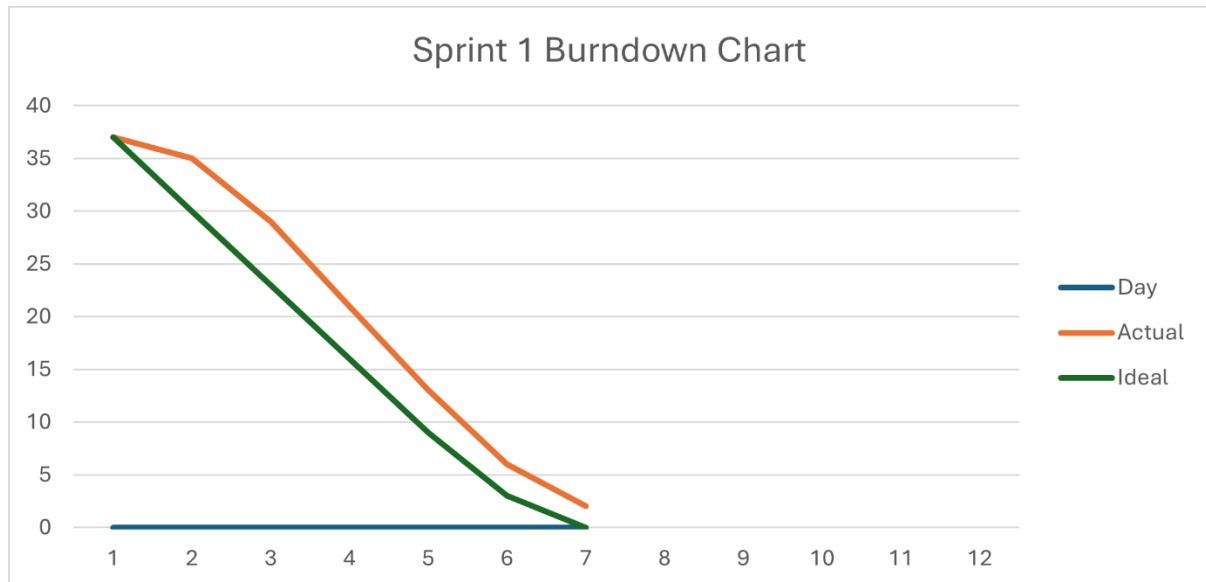

Extra Info Covered: This user story covers the creation of opportunity listings by providers and includes all required opportunity details. It also includes role-based access control managed by admins.

User Story 4: Approve Opportunity

Requirement Linked: Opportunity Listing-> Admins can approve or remove listings.

Extra Info Covered: This user story covers the admin approval workflow for opportunity listings. It ensures that only validated opportunities are published to applicants.

Sprint 1 Burndown Chart

The burndown chart shows the team's progress throughout Sprint 1 based on remaining story points. Progress during the early stages of the sprint was slower because the team focused on sprint planning, GitHub setup, database design, and project structure discussions. As development progressed, the remaining story points decreased steadily as user stories were implemented and tested before the sprint deadline.

The "Day" column represents the sprint timeline and shows the progress of the sprint across working days.

The "Actual" column represents the actual remaining story points at the end of each day based on the team's real progress during the sprint.

The "Ideal" column represents the expected remaining story points if work had been completed at a perfectly consistent rate throughout the sprint.

Day	Actual	Ideal
Day 1	21	21
Day 2	21	19
Day 3	20	17
Day 4	20	15
Day 5	17	13
Day 6	13	11
Day 7	9	8
Day 8	5	6
Day 9	2	3
Day 10	0	0

Sprint 2 Backlog

Identifier	User Story	Tasks	Assigned To	Status	Story Points
US-1	As a provider, I want to view opportunities I have created so that I can check their statuses.	Show all opportunities created by a provider together with their status	Ozuko	Completed	3

US-2	As a provider, I want to resubmit a rejected opportunity so that it can be reviewed.	Implement resubmitting an opportunity	Musawenkosi	Completed	3
US-3	As an applicant, I want to create a profile so that I can use it when applying for an opportunity.	Add personal details, education and skills fields to the schema; Create profile page; Allow applicants to save profile details	Dikeledi	Completed	5
US-4	As an applicant, I want to edit my profile so that it can have latest changes	Implement edit applicant profile	Thendo	Completed	3

US-5	As an applicant, I want to submit an application to an opportunity so that it is available for consideration .	Submit application using applicant profile and CV Link application to applicant and opportunity Allow applicants to submit applications Show applications to providers	Musawenkosi	Incomplete	8
US-6	As an applicant, I want to view applications I have submitted so that I can check their statuses.	Show applicants all submitted applications together with their status	Tlhalefo	Incomplete	3

User Story 1: View opportunities

As a provider, I want to view opportunities I have created so that I can check their statuses

UAT:

- **Given** I am a provider
- **When** I view opportunities I have created
- **Then** I should see their statuses

User Story 2: Resubmit Opportunity

As a provider, I want to resubmit a rejected opportunity so that it can be reviewed

UAT:

- **Given** I am a provider
- **When** I resubmit an opportunity
- **Then** it should be available for review

User Story 3: Create Profile

As an applicant, I want to create a profile so that I can use it when applying for an opportunity

UAT:

- **Given** I am an applicant
- **When** I create a profile
- **Then** I should be able to use it when applying

User Story 4: Edit Profile

As an applicant, I want to edit my profile so that it can have the latest changes.

UAT:

- **Given** I am an applicant
- **When** I edit my profile
- **Then** it should update to latest changes

User Story 5: Submit Application

As an applicant, I want to submit an application to an opportunity so that it is available for consideration

UAT:

- **Given** I am an applicant
- **When** I create an application
- **Then** providers should be able to see it

User Story 6: Application Status

As an applicant, I want to view applications I have submitted so that I can check their statuses

UAT:

- **Given** I am an applicant
- **When** I view my applications
- **Then** I should see their statuses

User Story – Requirement Traceability Matrix

This section provides a traceability mapping between the system's user stories and the corresponding documented requirements defined for the project.

- The system shall allow providers to view all opportunities they have created
- The system shall allow applicants to create a profile and upload a CV.
- The system shall allow applicants to apply for multiple opportunities.

User Story 1: View opportunities

Requirement Linked: Opportunity Listings -> The system shall allow providers to view all opportunities they have created.

User Story 2: Resubmit Opportunity

Requirement Linked: Opportunity Listings -> The system shall allow providers to post learnership/internship opportunities.

User Story 3: Create Profile

Requirement Linked: Applicant Profiles -> The system shall allow applicants to create a profile and upload a CV.

User Story 4: Edit Profile

Requirement Linked: Applicant Profiles -> The system shall allow applicants to create a profile and upload a CV.

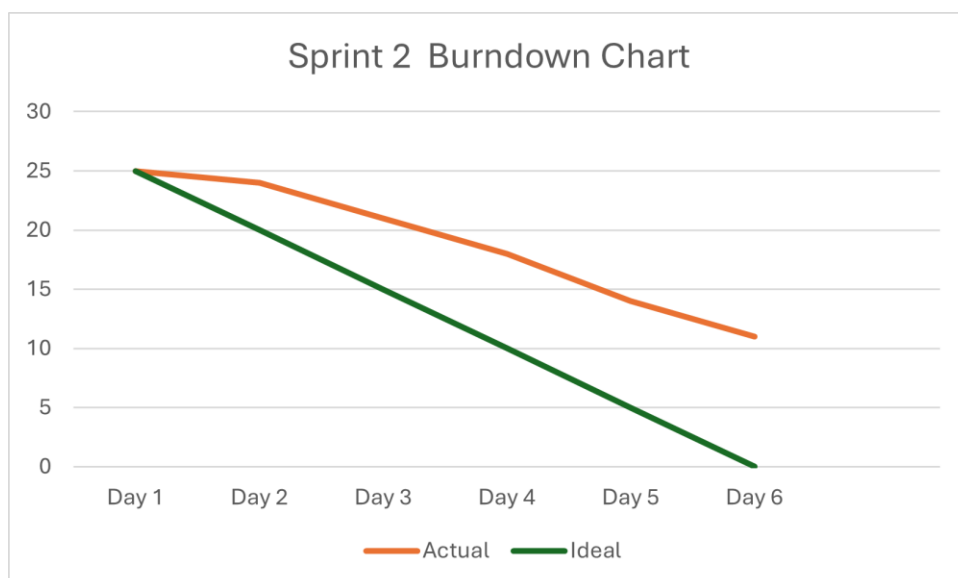

User Story 5: Submit Application

Requirement Linked: Applicant Profiles -> The system shall allow applicants to apply for multiple opportunities.

User Story 6: Application Status

Requirement Linked: Applicant Profiles -> The system shall allow applicants to apply for multiple opportunities.

Sprint 2 Burndown Chart

The burndown chart shows the team's progress throughout Sprint 2 based on remaining story points. Progress during the sprint was affected by frontend and backend

integration issues, testing requirements, deployment setup, UML alignment corrections, and debugging of existing features. Although substantial progress was made during the sprint, some user stories remained incomplete by the end of the sprint, which is reflected by the remaining story points above zero on the final sprint day.

Day	Actual	Ideal
Day 1	25	25
Day 2	24	20
Day 3	21	15
Day 4	18	10
Day 5	14	5
Day 6	11	0

The “Day” column represents the sprint timeline and shows the progress of the sprint across the working days of Sprint 2.

The “Actual” column represents the actual remaining story points at the end of each day based on the team’s real development progress during the sprint.

The “Ideal” column represents the expected remaining story points if work had been completed at a perfectly consistent rate throughout the sprint.

Sprint 3 Backlog

ID	User Story	Tasks	Assignee	Status	Points
US-1	As an applicant, I want to submit an application to an opportunity so that it is available for consideration	Submit application using applicant profile and CV Link application to applicant and opportunity Allow applicants to submit applications Show applications to the provider who created the opportunity	Musawenkosi	Completed	8
US-2	As an applicant, I want to view applications I have submitted so that I can check their statuses.	Show an applicant a list of all their applications together with their statuses	Tlhalefo	Completed	3
US-3	As a provider, I want to shortlist an application so that I can have a list of best candidates for an opportunity.	Show provider applications for created opportunity Show selected application details; Allow providers to shortlist applications Allow providers to view shortlisted applications	Dikeledi	Completed	8

US-4	As a provider, I want to reject an application so that I can remove it from consideration.	Allow providers to reject applications; Allow providers to view all rejected applications	Ozuko	Completed	5
US-5	As an applicant, I want to select my qualification from an official NQF-aligned list so that my profile contains valid and recognised qualifications.	Research SAQA NQF qualification source; Document source and justification Create qualification dataset; Replace hardcoded dropdown with dynamic data Implement auto NQF level mapping Save qualification and NQF level to backend	Thendo	Completed	8

US-6	As an applicant, I want to select standardised skill tags so that my profile skills are valid, searchable, and aligned with opportunity requirements	Research SA-aligned skills dataset; Document skills source and approach Create standardised skills dataset Implement skill validation logic Prevent duplicate skills Apply standardised skills to applicant profile Update filtering/search to use standardised skills	Thendo	Completed	8
US-7	As an applicant, I want to receive in-app notifications when I submit my application so that I can know that my application was received.	Send in-app notification when application is received Show applicant notifications Allow applicant to view full notification details	Tlhalefo	Completed	5

US-8	As an applicant, I want to receive in-app notifications when my application is shortlisted so that I can know that my application was shortlisted.	Send in-app notification when application is shortlisted	Dikeledi	Completed	3
US-9	As an applicant, I want to receive in-app notifications when my application is rejected so that I can know that my application was rejected.	Send in-app notification when application is rejected	Ozuko	Completed	3

User Story 1: Submit Application

As an applicant, I want to submit an application to an opportunity so that it is available for consideration

UAT:

Given I am an applicant

When I submit an application

Then it should be available for consideration

User Story 2: Application Status

As an applicant, I want to view applications I have submitted so that I can check their statuses

UAT:

Given I am an applicant

When I view my applications

Then I should see their statuses

User Story 3: Shortlist Application

As a provider, I want to shortlist an application so that I can have a list of best candidates for an opportunity

UAT:

Given I am a provider

When I shortlist an application

Then it should be available on the shortlisted applications list

User Story 4: Reject Application

As a provider, I want to reject an application so that I no longer consider it

UAT:

Given I am a provider

When I reject an application

Then it should be available on the rejected applications list

User Story 5: NQF Qualifications Integration

As an applicant, I want to select my qualification from an official NQF-aligned list so that my profile contains valid and recognised qualifications.

UAT:

Given I am an applicant

When I open the qualification dropdown

Then I should see SAQA-aligned qualification options

User Story 6: Skill Tag Standardisation

As an applicant, I want to select standardised skill tags so that my profile skills are valid, searchable, and aligned with opportunity requirements.

UAT:

Given I am an applicant

When I add a skill to my profile

Then only valid standardised skills should be accepted

User Story 7: Received Application Notifications

As an applicant, I want to receive in-app notifications when I submit my application so that I can know that my application was received

UAT:

Given I am an applicant and I just submitted an application

When I view my in app notifications

Then I should see a notification about my received application

User Story 8: Shortlisted Application Notifications

As an applicant, I want to receive in app notifications when my application is shortlisted so that I can know that my application was shortlisted

UAT:

Given I am an applicant and my application just got shortlisted

When I view my in app notifications

Then I should see a notification about my shortlisted application

User Story 9: Rejected Application Notifications

As an applicant, I want to receive in-app notifications when my application is rejected so that I can know that my application was rejected.

UAT:

Given I am an applicant and my application just got rejected

When I view my in app notifications

Then I should see a notification about my rejected application

User Story – Requirement Traceability Matrix

This section provides a traceability mapping between the system's user stories and the corresponding documented requirements defined for the project.

The system shall allow applicants to apply for multiple opportunities.

The system shall allow providers to shortlist or reject applications.

The system shall track application status for applicants.

The system shall send in-app notifications at each stage of the application process.

User Story 1: Submit Application

Requirement Linked: Applicant Profiles -> The system shall allow applicants to apply for multiple opportunities.

User Story 2: Application Status

Requirement Linked: Applicant Profiles -> The system shall allow applicants to apply for multiple opportunities.

User Story 3: Shortlist Application

Requirement Linked: Application Workflow-> The system shall allow providers to shortlist or reject applications.

User Story 4: Reject Application

Requirement Linked: Application Workflow-> The system shall allow providers to shortlist or reject applications.

User Story 5: NQF Qualifications Integration

Requirement Linked: Applicant Profiles -> The system shall allow applicants to create a profile and upload a CV.

User Story 6: Skill Tag Standardisation

Requirement Linked: Applicant Profiles -> The system shall allow applicants to create a profile and upload a CV.

User Story 7: Received Application Notifications

Requirement Linked: Notifications -> The system shall send notifications (in-app and email) at each stage of the application process.

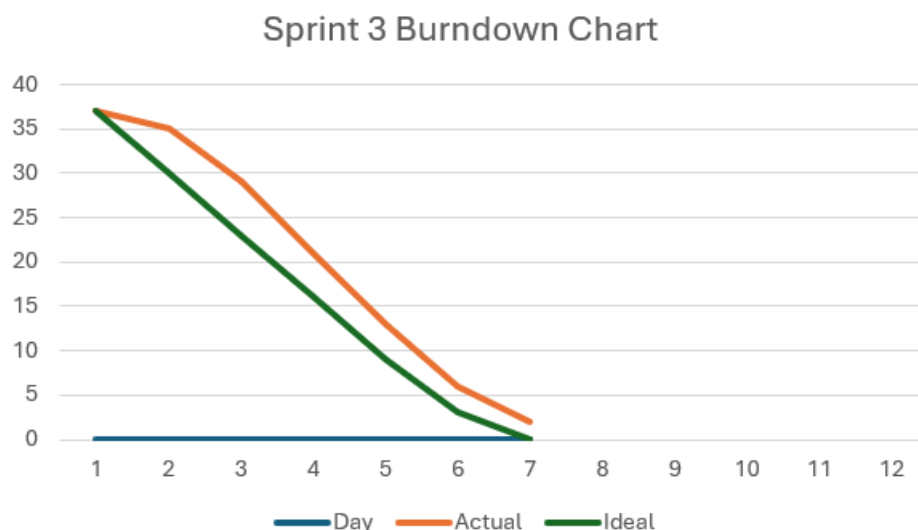

User Story 8: Shortlisted Application Notifications

Requirement Linked: Notifications -> The system shall send notifications (in-app and email) at each stage of the application process.

User Story 9: Rejected Application Notifications

Requirement Linked: Notifications -> The system shall send notifications (in-app and email) at each stage of the application process.

Sprint 3 Burndown Chart

The burndown chart shows the team's progress throughout Sprint 3 based on remaining story points. Sprint 3 included both newly assigned user stories and incomplete user

stories carried over from Sprint 2. As a result, progress accelerated earlier in the sprint because some functionality had already been partially implemented. The sprint also involved frontend and backend integration, notification workflows, qualification and skill standardisation, UML updates, testing, and UX improvements. The remaining story points decreased steadily throughout the sprint as tasks were completed and integrated into the system.

Day	Actual	Ideal
Day 1	51	51
Day 2	44	41
Day 3	34	31
Day 4	22	21
Day 5	10	11
Day 6	1	0

Sprint 4 Backlog

ID	User story	Tasks	Assigned To	Status	Story Points
US-1	As an admin or provider, I want to view application volume reports per opportunity so that I can analyse how many applicants applied for each opportunity	Retrieve total applications per opportunity Display application counts on dashboard Create graphical/tabular analytics view Export reports as CSV/PDF	Dikeledi	Completed	8
US-2	As an admin, I want to view placement success rates by sector so that I can analyse which sectors have the highest successful placement	Categorise opportunities by sector Calculate placement rates Display statistics on dashboard Export sector reports	Ozuko	Completed	8
US-3	As an admin or provider, I want to customise analytics views so that I can focus on specific report data relevant to me.	Filter analytics by opportunity/sector/status Implement custom dashboard views Allow report category selection	Thendo	Completed	8
US-4	As an applicant, I want opportunities to be automatically matched to my qualifications and skills so that I can easily discover relevant opportunities.	Compare qualifications and skills with requirements Use JSON datasets for matching Display matching opportunities Improve recommendations using profile data	Musawenkosi	Completed	8

	As an applicant I want to receive email notifications whenever my application status changes so that I can stay informed about the progress of my application	Send shortlisted/rejected email notifications Create email templates Trigger notifications after provider actions Ensure correct email delivery	Tlhalefo	Completed	5
--	---	--	----------	------------------	----------

User Story 1: Application Volume Report

As an admin or provider, I want to view application volume reports per opportunity so that I can analyse how many applicants applied for each opportunity

UAT:

- **Given** I am an admin or provider
- **When** I open the analytics dashboard
- **Then** I should see the application volume for each opportunity

User Story 2: Placement Success Rates by Sector

As an admin, I want to view placement success rates by sector so that I can analyse which sectors have the highest successful placement.

UAT:

- **Given** I am an admin
- **When** I open the analytics dashboard
- **Then** I should see placement success rates grouped by sector

User Story 3: Custom Analytics Views

As an admin or provider, I want to customise analytics views so that I can focus on specific report data relevant to me.

UAT:

- **Given** I am an admin or provider
- **When** I customize my analytics dashboard

- **Then** I should only see the report data I selected

User Story 4: Auto Matching Opportunities to Applicants

As an applicant, I want opportunities to be automatically matched to my qualifications and skills so that I can easily discover relevant opportunities.

UAT:

- **Given** I am an applicant
- **When** I view opportunities
- **Then** I should see opportunities that match my qualifications and skills

User Story 5: Application Status Email Notifications

As an applicant, I want to receive email notifications whenever my application status changes so that I can stay informed about the progress of my application.

UAT:

- Given I am an applicant
- When my application status changes
- Then I should receive an email notification informing me about the update

User Story – Requirement Traceability Matrix

This section provides a traceability mapping between the system's user stories and the corresponding documented requirements defined for the project.

User Story 1: Application Volume Report

Requirement Linked: Analytics -> The system shall provide dashboard reports that display the total number of applications submitted for each opportunity and allow the data to be viewed and exported for analysis purposes.

User Story 2: Placement Success Rates by Sector

Requirement Linked: Analytics -> The system shall provide analytical reports showing placement success rates grouped by sector to support evaluation of opportunity outcomes and sector performance

User Story 3: Custom Analytics Views

Requirement Linked: Analytics -> The system shall allow users to customise analytics dashboards and reports by selecting specific filters, categories, or report views relevant to their needs.

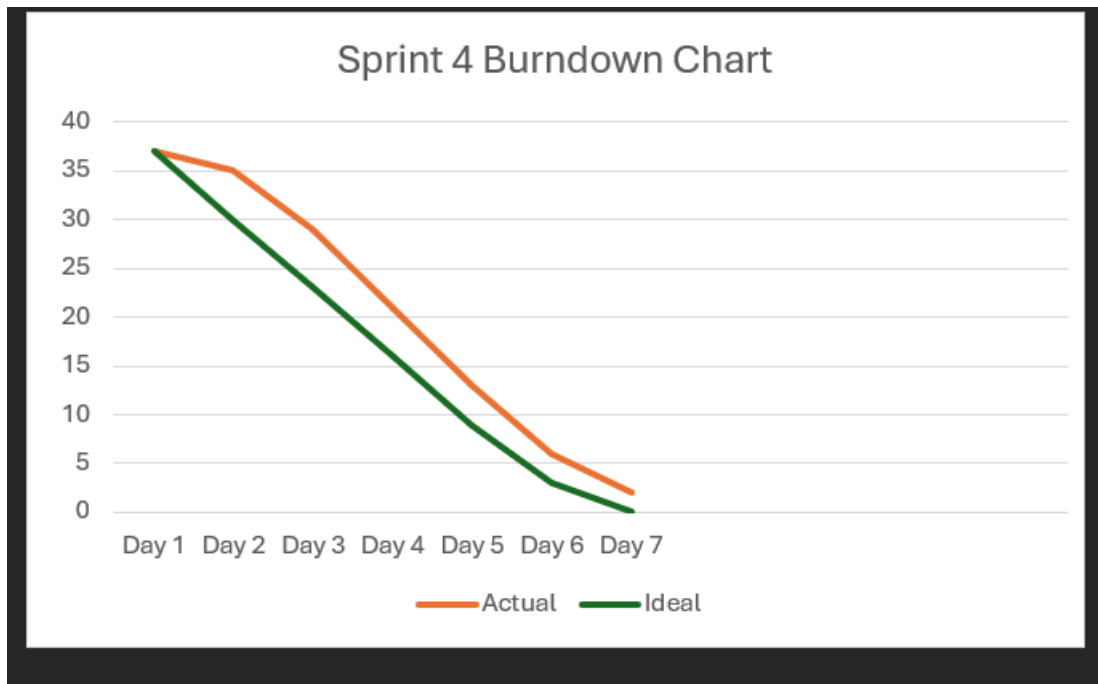

User Story 4: Auto Matching Opportunities to Applicants

Requirement Linked: Applicant Profiles and Notifications -> The system shall use applicant qualifications and skills to identify and recommend matching opportunities aligned with standardised NQF qualification and skills datasets.

User Story 5: Application Status Email Notifications

Requirement Linked: Notifications → The system shall send notifications (in-app and email) at each stage of the application process

Sprint 4 Burndown Chart

The burndown chart shows the team’s progress throughout Sprint 4 based on remaining story points. Sprint 4 focused on analytics reporting, auto-matching opportunities, email notifications, deployment preparation, testing, and final system integration. Progress during the sprint was initially slower due to academic commitments and delayed starts on some assigned tasks. Development progress increased during the middle of the sprint as team members completed their assigned reports and system features. Towards the end of the sprint, progress slowed slightly because the team focused on debugging, deployment issues, authentication conflicts, testing, code cleanup, documentation, and final submission preparation. The remaining story points decreased steadily throughout the sprint as functionality was completed and integrated into the system.

Day	Actual	Ideal
Day 1	37	37
Day 2	35	30
Day 3	29	23
Day 4	21	16
Day 5	13	9

Day 6	6	3
Day 7	2	0
