Product Backlog User Stories and Tasks

User Story 1: Register

Priority: High

As a user, I want to register using Google so that I can create an applicant account by default.

Tasks:

- Implement Google authentication
- Assign Applicant role by default
- Redirect users to dashboard

User Story 2: Login

Priority: High

As a user, I want to log in using Google so that I can access my account based on my role.

Tasks:

- Implement Google login
- Redirect users to role-based dashboard

User Story 3: Post Opportunities

Priority: High

As a provider, I want to post opportunities so that applicants can apply for them.

Tasks:

- Create opportunity form
- Store opportunity details
- Implement admin approval workflow

User Story 4: Application Workflow

Priority: High

As a provider, I want to shortlist or reject applications so that I can manage applicants effectively.

Tasks:

- View applications
- Shortlist applications
- Reject applications
- Update application statuses

User Story 5: Applicant Profiles

Priority: High

As an applicant, I want to create a profile and upload a CV so that providers can review my qualifications.

Tasks:

- Create profile page
- Upload CV
- Store profile details

User Story 6: Analytics Dashboard

Priority: Medium

As an admin or provider, I want to view analytics dashboards so that I can analyse application data.

Tasks:

- Create analytics dashboard
- Generate application volume reports
- Generate placement success reports
- Export reports as CSV/PDF

User Story 7: Notifications

Priority: Medium

As an applicant, I want to receive notifications about application status so that I can stay informed throughout the application process.

Tasks:

- Send in-app notifications
- Send email notifications
- Update notification statuses
- Display notifications to users

User Story 8: NQF Qualification Alignment

Priority: High

As an applicant or provider, I want qualifications and skill tags to align with the South African National Qualifications Framework so that opportunities and profiles use standardized qualification data.

Tasks:

- Research SAQA/NQF qualification datasets
- Populate qualification dropdowns dynamically

- Store qualification and skill data
- Match opportunities with qualifications
